Projects

1) BILLABLE APP

This is a Saas application for time tracking, Billing and Tracking of matters for Law firms.
This application is still in development mode. but we have launched 1st phase of this application.

We have implemented Lawpay, Stripe and Paypal pro payment gateways for invoice payment and Recurly for recurring payment.

URL : www.gobillable.com

Technologies Used : Ruby on Rails, Angular JS, Mysql
Ruby - 2.2.3
Rails - 4.2
Angular JS - 1.4.6

2) MINTER APP

This is a Time tracking & invoice related product which is mainly used for tracking time, creating
invoice based on tracked time and getting online payments through payment gateways like Stripe,Paypal

There are other futures for this product is like Estimation, Projects, Tasks,Reports based on logged hours, Gadgets etc.

We have also done integration with basecamp for tracking time in minterapp.

URL : www.minterapp.com

Technologies Used: Ruby on rails, MySQL
Ruby - 1.9.3
Rails - 3.2

3) RISKCHECK

This application is mainly used for people who are thinking to buy property or thinking to take a loanfrom bank.

In this application we do ask few questions to user regarding their past investments and purchases and based on answers of that questions we come up with the solution with risk involved in buying property.

Technologies Used : Ruby on rails, Mysql

Ruby - 1.9.3
Rails - 3.2

4) NOSHED-IT

This is an Iphone application regarding food alergies.

I have created filters for desktop application in this project using Mongodb

Database : MongoDB
